Hennepin County Electronic Polling Devices Agreement

To: City Council
From: Mark Kaltsas, City Administrator
Meeting Date: April 26, 2016

Discussion:

Hennepin County is upgrading the technology that will be used in place of traditional processes for the upcoming November elections. The County is going to be implementing an electronic registration roster in place of the commonly used paper copy. In order to achieve this new technology, the County will be providing the City with four (4) electric tablets that will be used in lieu of the paper roster. The County has drafted an agreement with the City which stipulates the terms of the use of the hardware and software.

It is recommended that the Council consider approval of the agreement with Hennepin County.
